EDUCATION

B.Tech — Computer Science & Engineering — CMR Technical Campus, Hyderabad

2023 – 2027

CGPA: 7.61 / 10 • Key Courses: DSA, OOP, DBMS, Computer Networks, OS

INTERNSHIP EXPERIENCE

Software Engineer Intern — Bluestock Fintech (Remote)

Dec 2025 – Jan 2026

- Shipped 5+ production backend features using Python & Django for a live fintech application, working end-to-end from design to deployment serving real users.
- Reduced API response time by ~30% by resolving performance bottlenecks across modules; fixed 20+ bugs cutting runtime error rates and improving stability.
- Collaborated cross-functionally via Git workflows, pull requests, code reviews and agile sprints; wrote PEP 8-compliant, production-ready, well-documented code.

PROJECTS

AI-Powered Placement Management System | Node.js · Express.js · MongoDB · Passport.js · Google OAuth · EJS [github →](#)

- Engineered a full-stack campus recruitment platform enabling placement officers to manage students, companies, interview schedules, and results via a centralized dashboard — reducing manual coordination effort significantly.
- Architected secure multi-strategy authentication (Passport.js + Google OAuth + session-based auth) with RBAC, RESTful APIs via Mongoose ODM, and automated CSV report generation for placement analytics.

AI Python Visual Compiler | Python · Django · Anthropic Claude API · HTML/CSS

[github →](#)

- Built an AI-powered browser IDE integrating Anthropic Claude API to generate real-time, step-by-step explanations of code execution — eliminates debugging confusion for beginners.
- Django REST backend handles sandboxed code execution securely; responsive frontend renders live output; full-stack with AI explanation layer on top.

Student Management System | Python · Django · SQLite · RBAC · HTML/CSS

[github →](#)

- Production-grade CRUD app managing 500+ student records with RBAC authentication, session management, add/edit/delete/search and 100% test coverage on core operations.
